Subject: Re: draft soils policy

These comments may seem silly.....but the definition of soil and fill are being interchanged. Should they be?

As a soil scientist, can the soils include anthropogenic material.....asphalt, coal ash, brick etc? Excavated material?

Perhaps include a definition(s) of the soil or material and the physical nature of the material pertains to this policy.

Will the hauler receiving the soil for transport be provided a notice that the cubic yards meets the requirements of this policy?

Any questions email or call me.

Bonnie
